Amazon Best Sellers: Best Dot Matrix Computer Printers
How Fast Can Dot Matrix Printers Print? On the whole, a 9-pin system prints more rapidly than a 24-pin configuration. Both styles of printers offer different printing speeds, depending on the density of characters and symbols desired, whether high-speed draft, normal draft, near-letter quality, or letter-quality modes.

David Kra. The number 9 or 24 refers to the number of pins vertically in the print head. As the head moves left to right, at each position it can fire any combination of pins toward the ribbon and paper. A 24 pin printer might also have finer steps in the horizontal dimension.

What is the difference between 9 pin and 24 pin dot matrix ...
The perceived quality of dot matrix printers depends on the vertical and horizontal resolution and the ability of the printer to overlap adjacent dots. 9-pin and 24-pin are common; this specifies the number of pins in a specific vertically aligned space.
