The VR6-A can replace KATO model K65-12B, BUT - the KATO only senses 120V instead of 200-240V like the VR6-A, so the installer will need to be sure the VR6-A is wired to accept 200-240V sensing!! Most gensets that have 120V also have 208 or 240V available, so it should be rather simple to change if a qualified tech is doing the installation.
