**Real Application Clusters Administration and ... - Oracle**  
About Administrative Tools for Oracle Real Application Clusters Environments. Oracle enables you to administer a cluster database as a single system image through Oracle Enterprise Manager, SQL\*Plus, or through Oracle RAC command-line interfaces such as Server Control (SRVCTL):

## **Introduction to Oracle Real Application Clusters**

Oracle Real Application Clusters (RAC) allows Oracle Database to run any packaged or custom application, unchanged across a server pool. This provides the highest levels of availability and

## Read Book Oracle Real Application Clusters Administration And Deployment Guide

the most flexible scalability. If a server in the pool fails, the Oracle database continues to run on the remaining servers.

### **Oracle Real Application Clusters (RAC) 11g Release 2**

The "Using the Scheduler in Real Application Clusters Environments" section in Oracle Database Administrator's Guide and "Load Balancing Advisory" Enhanced initialization parameter administration This feature improves database manageability by making it easier to administer the server parameter file (SPFILE).

### **What's New in Oracle Real Application Clusters ...**

Install Oracle Database 10 g Enterprise Edition and Oracle Real Application Cluster software. Create and configure the database. With an HIPLEX MSCF XCS cluster and an XCS shared pubset you implicitly get clusterware and shared disks with a cluster file system. The usual single instance installation puts you at the end of step 3.

## **Oracle Real Application Clusters (Oracle RAC)**

Oracle RAC is a cluster database with a shared cache architecture that overcomes the limitations of traditional shared-nothing and shared-disk approaches to provide highly scalable and available database solutions for all your business applications. Oracle RAC is a key component of Oracle's private cloud architecture.

## **Oracle Real Application Clusters 11g | Oracle RAC**

You can use the Oracle Real Application Cluster (RAC) option with your Oracle database to improve the availability of your SAP system. The RAC configuration replicates the database server. If one of the RAC instances fails, a surviving instance performs the recovery for the failed instance.
